

PostBase Vision Ink Cartridge Quick Reference Guide

This is a list of the most common ink cartridge issues.

Changing Ink Cartridge

- 1) From the Home screen, press the Menu button
- 2) On the Menu screen you will press the Ink Cartridge button
- 3) On the next screen select Change Cartridge
- 4) The machine will move the ink cartridge to the front and then the flap will automatically open. NEVER pry this door open, it will damage the flap sensor, requiring a service call
- 5) Follow the directions on the screen to change the cartridge out

This is probably a good time to call 303-237-8644 and order more ink.

Poor Quality Impressions

There are a few reasons you may be getting a poor impression, or a partial impression.

- 1) The cartridge needs to be cleaned.
 - a) From the Home screen, press the Menu button
 - b) On the Menu screen you will press the Ink Cartridge button
 - c) From the Change Cartridge menu, select Cleaning and follow the on-screen directions
- 2) If a regular cleaning has not helped, you can do an intensive cleaning.
 - a) From the Home screen, press the Menu button
 - b) On the Menu screen you will press the Ink Cartridge button
 - c) From the Change Cartridge menu, select Intensive Cleaning and follow the on-screen directions
- 3) You may need to do a Manual Cartridge Cleaning to clean the Ink Plug
 - a) This is accomplished by wiping the nozzle plate until ink is drawn out and absorbed into the cloth.
 - b) The cloth must be soft so that it does not scratch the print cartridge. It should be fiber less because small fibers from the cloth can be left behind and block the nozzles of the print cartridge.
 - c) Moisten the cloth with water to prevent scratching the print cartridge. (Scratches on the print cartridge prevent the ink from coming out of the nozzle straight.)
 - d) Distilled water is better than tap water because tap water contains minerals that can leave behind deposits in the chambers. During wiping, the water cleans out the nozzles and the firing chambers. A small amount of water mixes with the ink in the chambers.
 - e) After performing this procedure, you should start to see ink flow on the cloth. Re-install the cartridge and test
